

Junior Mobile UX/UI Designer f/m/x

Full-time | on-site in Leonding | hybrid model with partly home office

candybytes

There is nothing as sweet as combining the passion for great code with **social entertainment**. Since 2010 we have the pleasure to provide our expertise in **app development** and have published over 50 apps. Our digital products sweeten the life of **+250.000 users** every day.

Are you eager to leave your footprint in the world of social entertainment with us?

Your Candy:

- Create and improve the UI of candybytes' Android / iOS app portfolio
- Hands-on with the products, visualize, prototype, test your design solutions
- Developing on the cutting edge of *Android* user flows and **Material You Design**
- Closely collaborating with developers in an agile environment
- Design and architect new solutions, or introduce new tools, as appropriate to support candybytes' growth
- Share knowledge and expertise across the designers

What to bring along:

- A degree in Graphics Design
- **1+ years** practical experience with designing *mobile* apps
- Excitement and passion about User Interface Design, using the newest patterns and tools like **Figma** or **Adobe**
- Ability to design software products and systems for consumer
- Comfortable working in an multidisciplinary team
- An independent workflow
- Excellent written and spoken English skills

Show us your candy and send us your application documents by writing to: career@candybytes.com

Next to candies, we certainly like to compensate you financially ranging between EUR 24.000,- and EUR 34.000,- gross annually, depending on your skills and previous work experience.
